### Summary

I am a graduate of FPT University, majoring in Software Engineering. I am passionate about Frontend Development and have a solid foundation in modern web technologies such as HTML, CSS, JavaScript, TypeScript, and ReactJS. I enjoy building responsive and user-friendly interfaces, and I'm eager to enhance my skills through real-world projects. I am ready to learn and contribute to a dynamic frontend development team.

### Education

#### FPT UNIVERSITY

Software Engineering

2021 - 2025

### Experience

#### Amazing Tech

Front-end Internship

01/2024 – 05/2024

Hồ Chí Minh City,  
Việt Nam

### Skills

#### English

- Able to read technical documents and communicate effectively in basic conversations.

#### Frontend

- HTML, CSS, JavaScript, TypeScript, ReactJS, NextJS, Tailwind CSS

#### Backend

- NodeJS, ExpressJS

#### Database

- MongoDB, Firebase

#### Tools

- Postman, Git

### Certificates

#### Coursera

- Software Development Lifecycle [🔗](#)
- Web Design for Everybody: Basics of Web Development & Coding [🔗](#)

## Project

### Vinshuttle

**Role:** Frontend

**Team size:** 4

**Duration:** Jan 2025 – May 2025

**Tech stack:** ReactJS, Next.js, React Native, NestJS, MongoDB, Swagger

- Built a web & mobile EV booking system for large urban areas (e.g., Vinhomes Grand Park, HCMC).
- Developed role-based apps (Customer, Manager, Admin, Driver) with real-time tracking, route optimization, payments, and booking management.
- Created reusable components, managed state, integrated APIs, and wrote user docs.

### Web bakery

**Role:** Frontend & Backend

**Team size:** 3

**Duration:** Jul 2024 – Nov 2024

**Tech stack:** React.js (Vite), Ant Design, Three.js, Node.js, Express, MongoDB, Firebase

- Built an online bakery marketplace for browsing, ordering, and managing products from multiple stores.
- Developed frontend with React + Ant Design, integrated a 3D cake design tool (Three.js), and built backend APIs with Node.js, Express, MongoDB (JWT auth).
- Implemented store management, order handling, and sales stats features.

### Web Booking Courts

**Role:** Frontend, Backend

**Team size:** 4

**Duration:** May 2024 – June 2024

**Tech stack:** ReactJS, Tailwind CSS, Vite, TypeScript, Node.js, ExpressJS, MongoDB

- Built a full-featured web-based court booking system for sports venues.
- Developed role-based interface for users and admins to search courts, manage bookings, make payments, and track revenue.
- Built reusable UI components, handled state management, integrated RESTful APIs, and optimized user workflows.
